A Blast from the Past:

- Here is just a sample of the type of activities taking place in the RRS today. The RRS is more than just a club; it's an environment where one can explore safely any aspect of amateur rocketry.

(A Plexiglass / O₂ Hybrid motor is being tested)

(This is Tom Muller's LOX Propane engine undergoing a Static Test at the MTA)

(A Sugar / KNO₃ motor being assembled at the MTA)

(A RRS Beta Style Zinc Sulfur motor ready for loading)

(A Zinc / Sulfur motor takes off!)
(Click Image to watch the video of it taking off!)

(A very large Zinc / Sulfur motor takes off at the MTA)

(George Garboden's large HTPB/AP booster is on its way to 50K Feet)
(Click Image to See video of Launch)

(A Student Project from Kansas lift's off at the MTA!)

(A 650lbf LOX / Ethanol engine undergoes static testing)

(Scott Clafflin's LOX / Ethanol Flight vehicle on the Stand)

(Click image to watch video of flight)
